## Manual

# Product Overview

## Creativity in the Palm of Your Hand

The mini-sized, mega-capable ELEV Box3 is just as powerful as it is portable. Weighing less than 30.8g and with upgraded vaporizing features, it's not only use-friendly, it's also the most portable 2mL disposable in its series. With the unique contrast color design and mini cola product appearance, it redefines what it means to box-like disposable.

# Specifications

Dimension :	22.98mm*41.98mm*75.9mm
Tank Volume :	2.0mL
Battery Capacity :	280mAh
Resistance :	1.4Ω
Output Power :	0~0.5S 11.1W ; 0.5S~5S 9.4W ; 5S~10S 7.9W
Intake Hole :	4*Φ1.5mm
Tank Material :	PCTG (Food Grade)
Mouthpiece Material :	PC (Food Grade)
Central Post :	Stainless Steel (SUS304)
Battery Material:	PC+ABS
Activation :	Button Activated
Ceramic Coil :	Formatrix™ Ceramic Heating Coil
Charging :	Type-C
Tip Type :	Snap-In

# Features

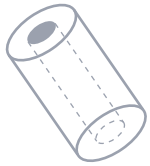

## Unique Product Design

With the unique product appearance and soft-touching rubber paints, ELEV Box3 presents a visual experience unlike any other product. The impressive cup-like design is both individual and portable, making your experience more creative and interesting.

# Features

## Next-Level Vaping Performance

Feel the thrill of superior vaporizing performance provided by the improved Formatrix™ ceramic heating technology. The fast-responding button activated system gives you an ultra-smooth, multi-functional vaping experience.

# Features

## Custom Colors Available

ELEV Box3 stands out in more ways than one. Product appearance with customizable-color, ELEV Box3 allows cannabis aficionados to make their vaping experience as unique as they are.

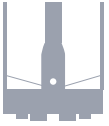

## BioBaleen™ Module

Reduce Spit-Back by 99%

The key to this innovation is the soft-touched silicone brush, which can effectively absorb oil splashes during vaping. The BioBaleen™ cap combines the traditional cotton filter and the silicone cap to achieve cost-effective technology and reduce 99% spit-back issue. The technology eliminates one of the occurrences of oil pollution, all efforts are thus taken to maintain the oil's cleanliness and pureness. You won't believe how a tiny design breakthrough could improve your daily vapor experience.

## Vshaped™ Design

### No Oil Wastage

Oil with high viscosity is slow-moving and directionless when it is placed on a flat surface. We often receive feedback about residual cannabis oil in the oil chamber which cannot flow into the ceramic heating core. According to the basic principle of gravity, Cilicon restructured the bottom surface of the oil chamber into a V-shaped form toward the ceramic heating core instead of keeping it flat, ensuring all the remaining oil is used without any cannabis oil waste.

# User Manual

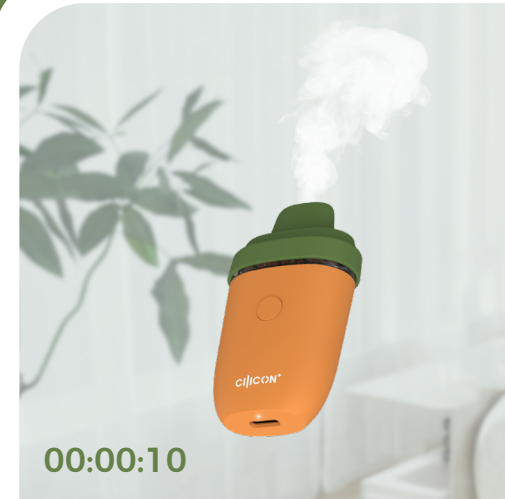

## Turn On / Off

Consecutively press button 5 times within 2 seconds, the vaporizer will start/stop working once the LED indicator flashes twice.

## Inhalation

Press the button to start vaping, the LED indicator will gradually light up. Press the button to stop vaping, the LED indicator will gradually fade out.

## Overdose Protection

Pressing the button exceeds 10 seconds, the LED indicator will flash twice before it stops working.

## Low Voltage Protection

Once the battery voltage is below  $3.1V \pm 0.2V$  during vaping, the LED indicator will consecutively flash 10 times before it stops working.

# User Manual

## Short-circuit Protection:

Once short circuit or low resistance is detected during vaping, the LED indicator will be on for 2 seconds, and the device stops working.

## Voltage Setting:

The voltage of ELEV Box3 varies in different heating stages. The voltage is 3.8V for the first 0.5 seconds, then decreases to 3.5V from 0.5 to 5 seconds. From 5 to 10 seconds, the voltage remains at 3.2V. These are all aimed at providing consistent heating.

## Charging:

Charge ELEV Box3 with Type-C.

During the charging process, the white LED indicator is always on.

When the battery is fully charged, the white LED indicator will be off.

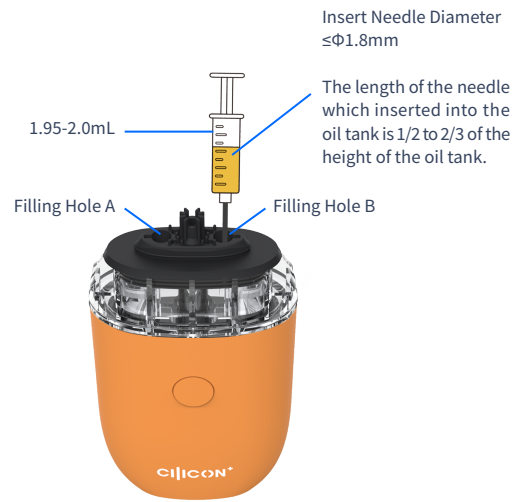

When unplugging the charger, the white LED indicator will flash 3 times.

Vaping is available during the charging process.

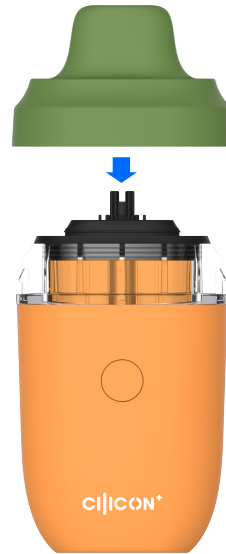

# Filling Instruction

1

## Insert filling needle in either Filling Hole A or B

Do not overfill or allow oil to enter the center post.

2

## Snap-in Mouthpiece

If the concentrate is as liquid as edible oil, please snap in the mouthpiece within 90s. If the concentrate is thicker than edible oil, please snap in the mouthpiece within 180s.

When snapping in the mouthpiece, must place the device on a flat and stable surface and the mouthpiece must be upright and vertical.

3

## Finish Filling and Capping

After snapping in the mouthpiece, please may the product sit still for 4 hours before using.

4

## Final Product

After take off the silicon rubber case, suggest to finish the oil within two weeks.
